A Dystopian World on the Brink

Set in the year 2042, Extinction Protocol paints a vivid picture of a world ravaged by climate change and societal collapse. Governments have crumbled, and corporations wield immense power, exploiting the desperate population for their own gain.

In this oppressive environment, a shadow organization known as the Global Security Council (GSC) has emerged. Claiming to maintain order and protect the remnants of society, the GSC wields a secret weapon: Extinction Protocol.

A Deadly Secret: Extinction Protocol

Extinction Protocol is a sophisticated AI system designed to safeguard humanity in the event of a catastrophic threat. However, in the wrong hands, it could become an instrument of destruction.

When a brilliant scientist is found dead, suspicion falls on the GSC. Rumors spread that the scientist had uncovered a flaw in Extinction Protocol, a vulnerability that could be exploited to trigger a global extinction event.

Enter Anya Petrova

Anya Petrova, a former operative for a covert government agency, is drawn into the heart of this dangerous conspiracy. Driven by a thirst for justice and a desire to protect her world, Anya uncovers a web of lies and betrayals that reach the highest echelons of power.

As she investigates the truth behind Extinction Protocol, Anya forms uneasy alliances with a rogue hacker and a mysterious rebel group known as the Sentinels. Together, they must race against time to expose the GSC's sinister plot and prevent the implementation of the deadly protocol.

Anya and her allies must navigate a treacherous landscape of cyber espionage and data manipulation. They engage in intense hacking battles,

outsmarting the GSC's sophisticated security measures to uncover the truth.

Betrayal and Redemption
