Hard science fiction is a subgenre of science fiction that adheres strictly to scientific principles and technological possibilities. It explores the potential consequences of scientific advancements, often delving into complex themes such as the nature of reality, the human condition, and the vastness of the universe.

The following is a list of the top hard science fiction stories of the year, each offering a unique and thought-provoking exploration of the scientific frontier.

The Martian by Andy Weir

When astronaut Mark Watney is stranded on Mars after a catastrophic mission, he must use his ingenuity and scientific knowledge to survive and find a way back home.
